

**New Jersey Department of Health and Senior Services**  
**Communicable Disease Service**  
**Influenza Activity Summary**  
**Week Ending April 14, 2007 (MMWR Week 15)**

**Influenza activity level:**    **REGIONAL**

No Activity- At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases

Sporadic – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the state within previous 3 weeks **OR** at least one laboratory confirmed outbreak in an institution anywhere in the state

Local – At least 2 or 3 parameters above state baseline in a single county **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county

Regional – At least 2 of 3 parameters above state baseline in  $\geq 2$  but  $\leq 10$  counties **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in  $\geq 2$  but  $\leq 10$  counties

Widespread – At least 2 of 3 parameters above state baseline in  $> 10$  counties **OR** institutional outbreaks in  $> 10$  counties **AND** lab confirmed influenza cases in previous 3 weeks.

Parameter = School, emergency department, or long term care weekly surveillance data

Baseline is calculated by taking the average of statewide percentages of ILI for a 3 year (2004, 2005, 2006) period during months when influenza is less likely to be circulating (May-August). Weeks in which less than 4 counties reported were not included in the calculation.

## **Regional Data**

### **LOCAL ACTIVITY – NW and NE SPORADIC ACTIVITY – CW, CE and South**

**NOTE:** Only one county in the NE and NW public health regions were above state baseline and had laboratories confirmed influenza by viral isolation in the previous three weeks. In the CW, CE and South public health region no single county had positive laboratories and parameters above state baseline, however, positive laboratory reports were received in these 3 regions.

#### Public Health Regions

NW Region (Morris, Passaic, Sussex, Warren)

NE Region (Bergen, Essex, Hudson)

CW Region (Hunterdon, Mercer, Somerset)

CE Region (Middlesex, Monmouth, Ocean, Union)

South Region (Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Salem)

No Activity - At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases in the public health region

Sporadic – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the public health region **OR** at least one laboratory confirmed outbreak in an institution anywhere in the public health region

Local – At least 2 or 3 parameters above state baseline in a single county of a public health region **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county of a public health region

Regional – At least 2 of 3 parameters above state baseline in at least half of counties of public health region **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in at least half of counties of public health region counties

Widespread – Not used for public health region data

Public Health Region Influenza Data

## Laboratory Surveillance

To date, 379 influenza specimens were found to be positive by viral culture. The below chart describes the number and type of influenza by MMWR week and county.

Influenza Type	Number positive	County Data		
		County	# positive	MMWR Week

Influenza Laboratory Report  
Viral Culture Positive Specimens by MMWR Week

## Influenza-like Illness (ILI) Surveillance\*

### Emergency Departments

During week 15, 4.88% ILI was reported statewide from emergency departments. This is a decrease over the previous week (5.14%). The percent ILI for each county ranged from 0.00 to 22.38%. The percent ILI for this same week last year was 3.89% in emergency departments. The percent ILI for the northwest (3.73%), northeast (3.88%), central west (7.06%), and central east (7.77%) public health regions were above state baseline (3.71%).

#### New Jersey Department of Health and Senior Services Influenza-like Activity - Emergency Departments

## Long-term Care Facilities

During week 15, 0.75% ILI was reported statewide from long term care facilities. This is an increase over the previous week (0.65%). The percent ILI for each county ranged from 0.00% to 2.36%. The percent ILI for this same week last year was 1.61% in long-term care facilities. The percent ILI for the northeast (2.22%) public health region was above baseline (1.05%).

### New Jersey Department of Health and Senior Services Influenza-like Activity - Long Term Care Facilities

## School Absenteeism

During week 15, schools reported 4.16% absenteeism. This is a decrease over the previous week (5.64%). The percent ILI for each county ranged from 1.43 – 10.09%. The percent absent for this same week last year was 5.18%. The percent ILI for the south (7.58%) public health region was above state baseline (4.68%). The number of school reports received was low due to many school closures.

## **Sentinel Provider Surveillance**

During week 15, 2.70% of sentinel provider patient visits were due to ILI. These data reflect reports from four (9%) of the enrolled sentinel providers.

### **UPDATE**

During week 14, 1.88% of sentinel provider patient visits were due to ILI. These data reflect reports from fifteen (32%) of the enrolled sentinel providers.

During week 13, 1.84% of sentinel provider patient visits were due to ILI. These data reflect reports from fifteen (32%) of the enrolled sentinel providers.

## **Pediatric Influenza Surveillance**

To date, NJDHSS has received 94 reports of pediatric illness. To date, 11 cases have met the case definition for pediatric illness or death associated with influenza.

## **122 City Mortality Report**

During week 14, 6.35% of all deaths reported by the vital statistics offices in 6 New Jersey cities (i.e., Camden, Jersey City, Elizabeth, Newark, Paterson, Trenton) were due to pneumonia or influenza. This was an increase over the previous week (6.15%). The percentage of death due to pneumonia or influenza for this same week last year was 6.21%.

## **RSV Reports**

During week 15, 6.96% of all RSV samples tested were positive. This was an increase over the previous week 8.07%. The percent of samples positive RSV for this same week last year was 14.91%.

**New Jersey Department of Health and Senior Services  
Respiratory Syncytial Virus (RSV) Surveillance by Week**

## **Additional Information**

For additional information regarding influenza surveillance please visit the following websites.

<http://nj.gov/health/flu/surveillance.shtml>

<http://www.cdc.gov/flu/>

\* Baseline is calculated by taking the average of statewide percentages of ILI for a 3 year (2004, 2005, 2006) period during months when influenza is less likely to be circulating (May-August). Weeks in which less than 4 counties reported were not included in the calculation.

\*\*Three year average is an average of the 2003-2004, 2004-2005, and 2005-2006 influenza seasons.
