

**New Jersey Department of Health and Senior Services**  
**Communicable Disease Service**  
**Influenza Activity Summary**  
**Week Ending March 31, 2007 (MMWR Week 13)**

**Influenza activity level:    **WIDESPREAD****

**No Activity**- At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases

**Sporadic** – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the state within previous 3 weeks **OR** at least one laboratory confirmed outbreak in an institution anywhere in the state

**Local** – At least 2 or 3 parameters above state baseline in a single county **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county

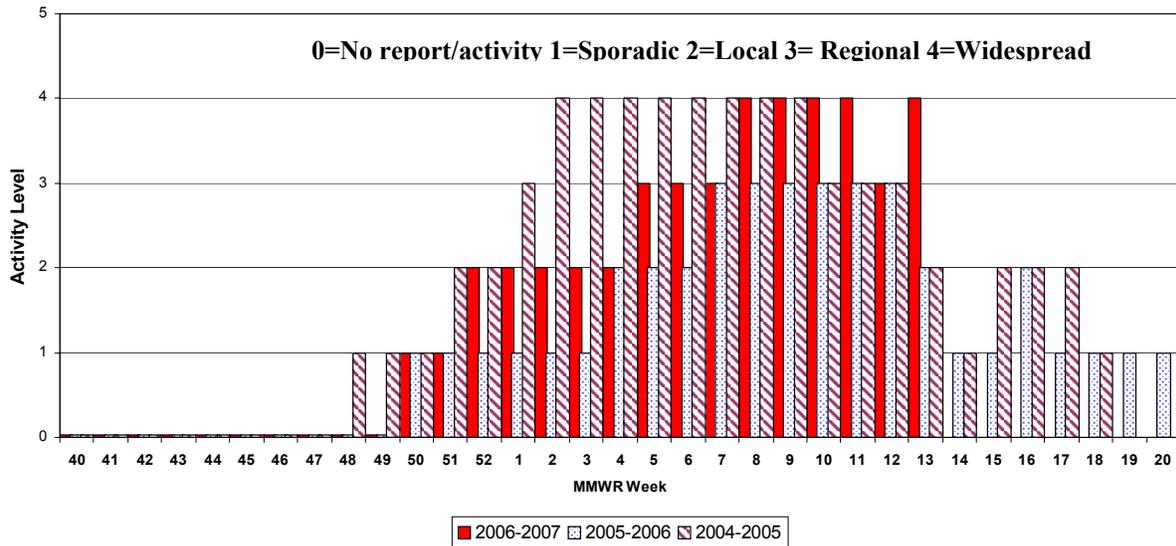

**Regional** – At least 2 of 3 parameters above state baseline in  $\geq 2$  but  $\leq 10$  counties **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in  $\geq 2$  but  $\leq 10$  counties

**Widespread** – At least 2 of 3 parameters above state baseline in  $> 10$  counties **OR** institutional outbreaks in  $> 10$  counties **AND** lab confirmed influenza cases in previous 3 weeks.

Parameter = School, emergency department, or long term care weekly surveillance data

Baseline is calculated by taking the average of statewide percentages of ILI for a 3 year (2004, 2005, 2006) period during months when influenza is less likely to be circulating (May-August). Weeks in which less than 4 counties reported were not included in the calculation.

New Jersey Department of Health and Senior Services  
 Statewide Influenza Activity Levels

## Regional Data

**REGIONAL ACTIVITY – NE and CE**

**LOCAL ACTIVITY – CW**

**SPORADIC ACTIVITY – NW**

**NO ACTIVITY- SOUTH**

**NOTE:** More the half of the counties reporting in the NE and CE public health regions were above state baseline and more than half the counties had laboratories confirmed influenza by viral isolation in the previous three weeks. Only one county in the CW public health region was above state baseline and had laboratories confirmed influenza by viral isolation in the previous three weeks. In the NW public health region no single county had positive laboratories and parameters above state baseline, however, positive laboratory reports were received for 2 counties. The parameters for the south public health region were not above baseline and no positive laboratories were received in the past 3 weeks.

### Public Health Regions

NW Region (Morris, Passaic, Sussex, Warren)

NE Region (Bergen, Essex, Hudson)

CW Region (Hunterdon, Mercer, Somerset)

CE Region (Middlesex, Monmouth, Ocean, Union)

South Region (Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Salem)

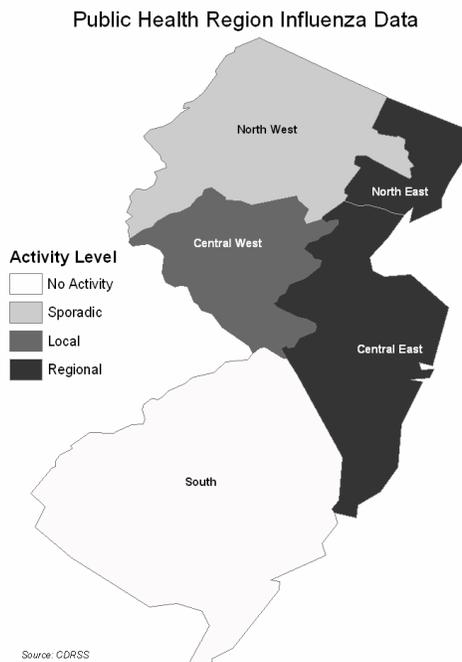

No Activity- At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases in the public health region

Sporadic – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the public health region **OR** at least one laboratory confirmed outbreak in an institution anywhere in the public health region

Local – At least 2 or 3 parameters above state baseline in a single county of a public health region **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county of a public health region

Regional – At least 2 of 3 parameters above state baseline in at least half of counties of public health region **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in at least half of counties of public health region counties

Widespread – Not used for public health region data

## Laboratory Surveillance

To date, 339 influenza specimens were found to be positive by viral culture. The below chart describes the number and type of influenza by MMWR week and county.

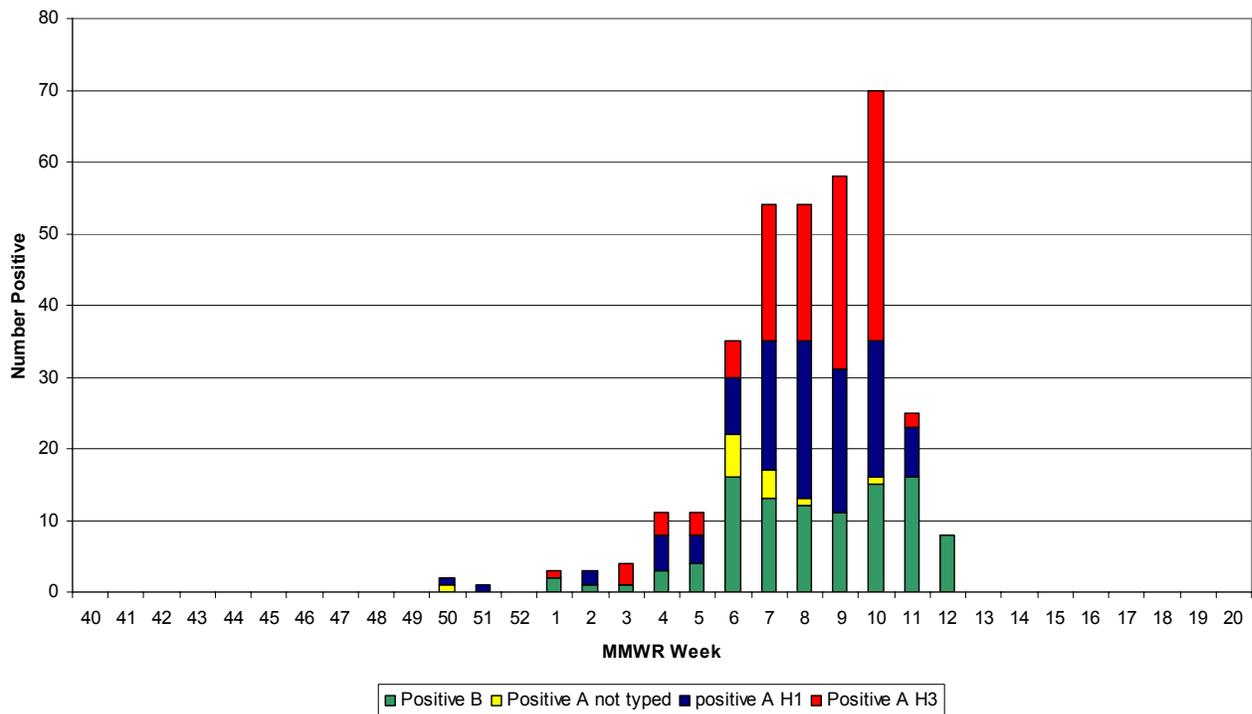

Influenza Type	Number positive	County Data			Influenza Type	Number positive	County Data

Viral Culture Positive Specimens by MMWR Week**

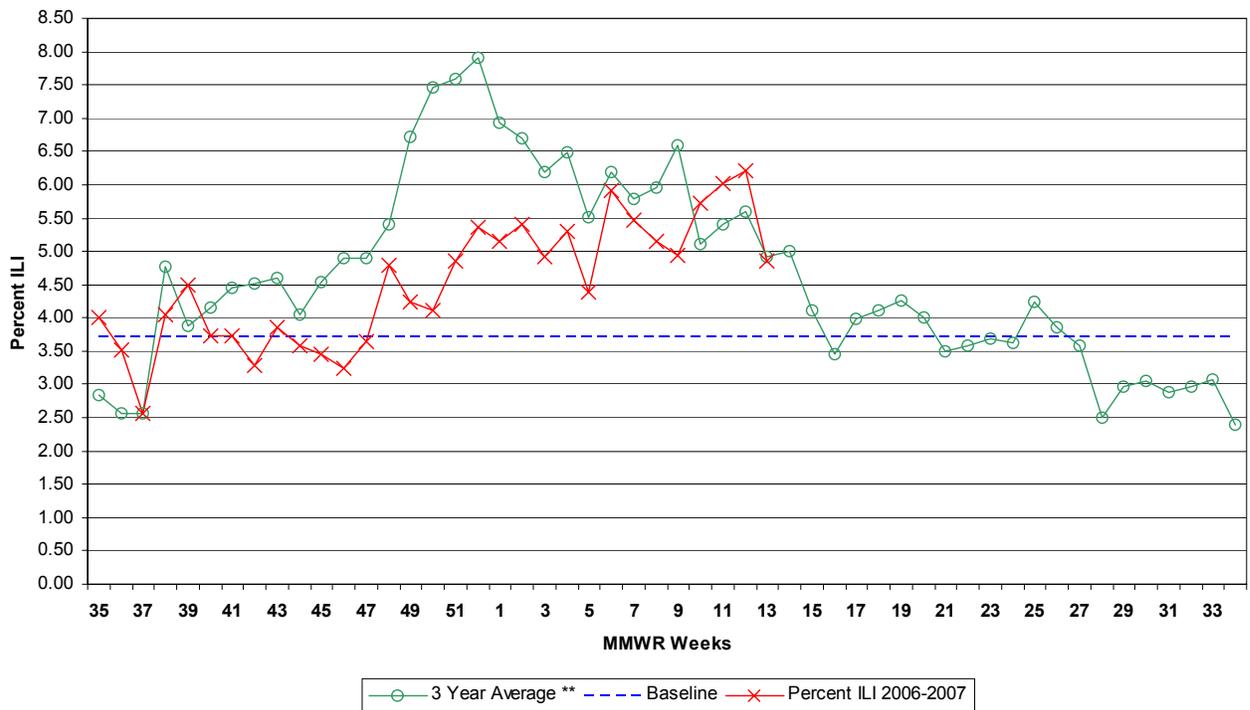

# Influenza-like Illness (ILI) Surveillance\*

## Emergency Departments

During week 13, 4.86% ILI was reported statewide from emergency departments. This is a decrease over the previous week (6.22%). The percent ILI for each county ranged from 0.00 to 11.48%. The percent ILI for this same week last year was 4.74% in emergency departments. The percent ILI for the northwest (5.52%), northeast (6.16%), central west (3.97%), and central east (6.02%) public health regions were above state baseline (3.71%).

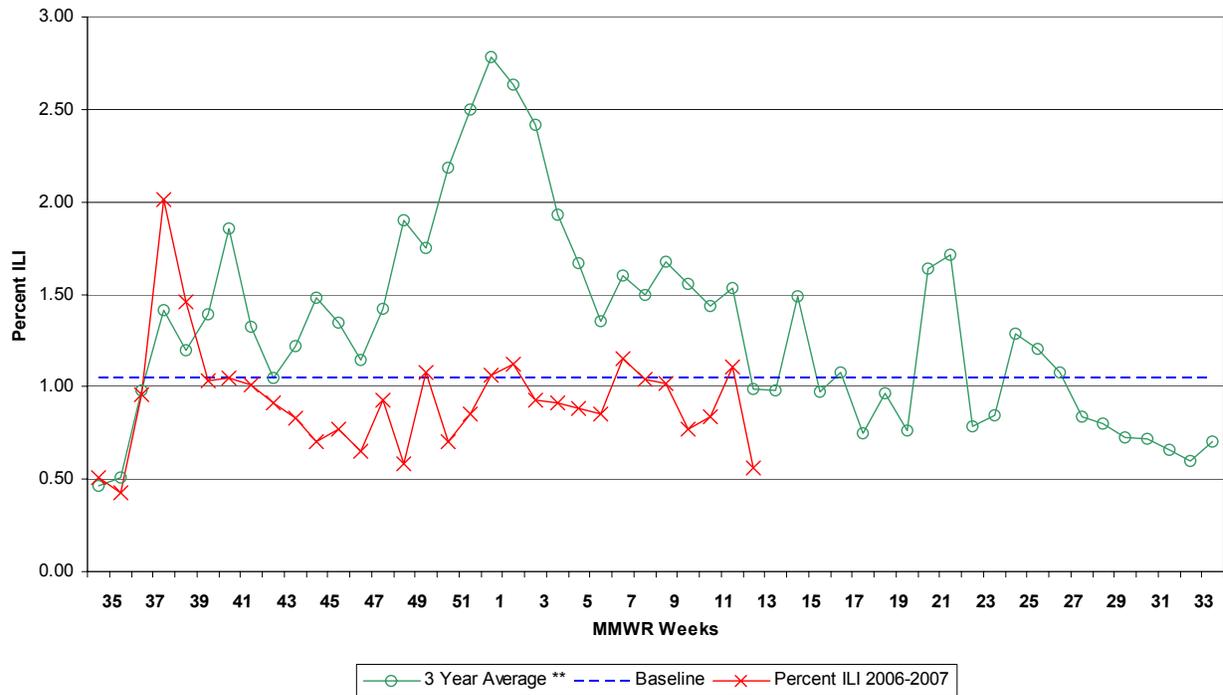

New Jersey Department of Health and Senior Services  
Influenza-like Activity - Emergency Departments

## Long-term Care Facilities

During week 13, 0.56% ILI was reported statewide from long term care facilities. This is a decrease over the previous week (1.11%). The percent ILI for each county ranged from 0.00% to 2.17%. The percent ILI for this same week last year was 0.82% in long-term care facilities. The percent ILI was not above baseline (1.05%) in any public health region.

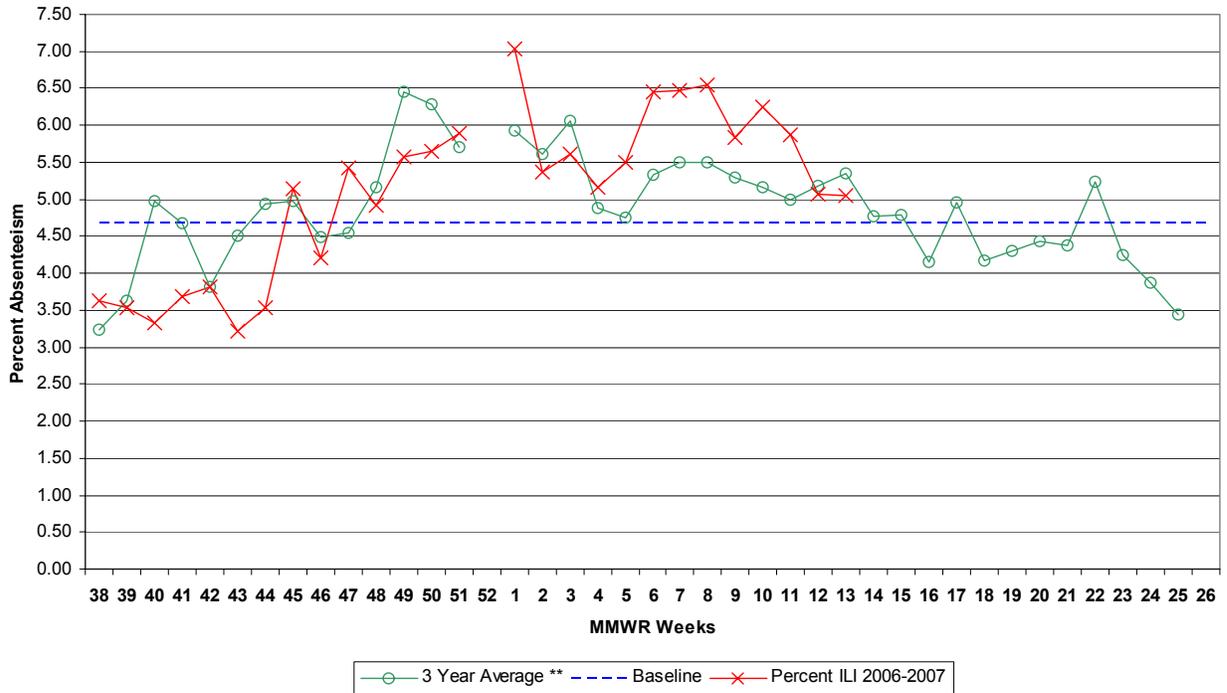

**New Jersey Department of Health and Senior Services  
Influenza-like Activity - Long Term Care Facilities**

## School Absenteeism

During week 13, schools reported 5.05% absenteeism. This is a slight decrease over the previous week (5.07%). The percent ILI for each county ranged from 2.70 – 7.62%. The percent absent for this same week last year was 5.05%. The percent ILI for the northwest (5.60%), the northeast (5.76%), the central east (5.24%) and the south (4.98%) public health regions were above state baseline (4.68%).

**New Jersey Department of Health and Senior Services  
Influenza-like Activity - School Absenteeism**

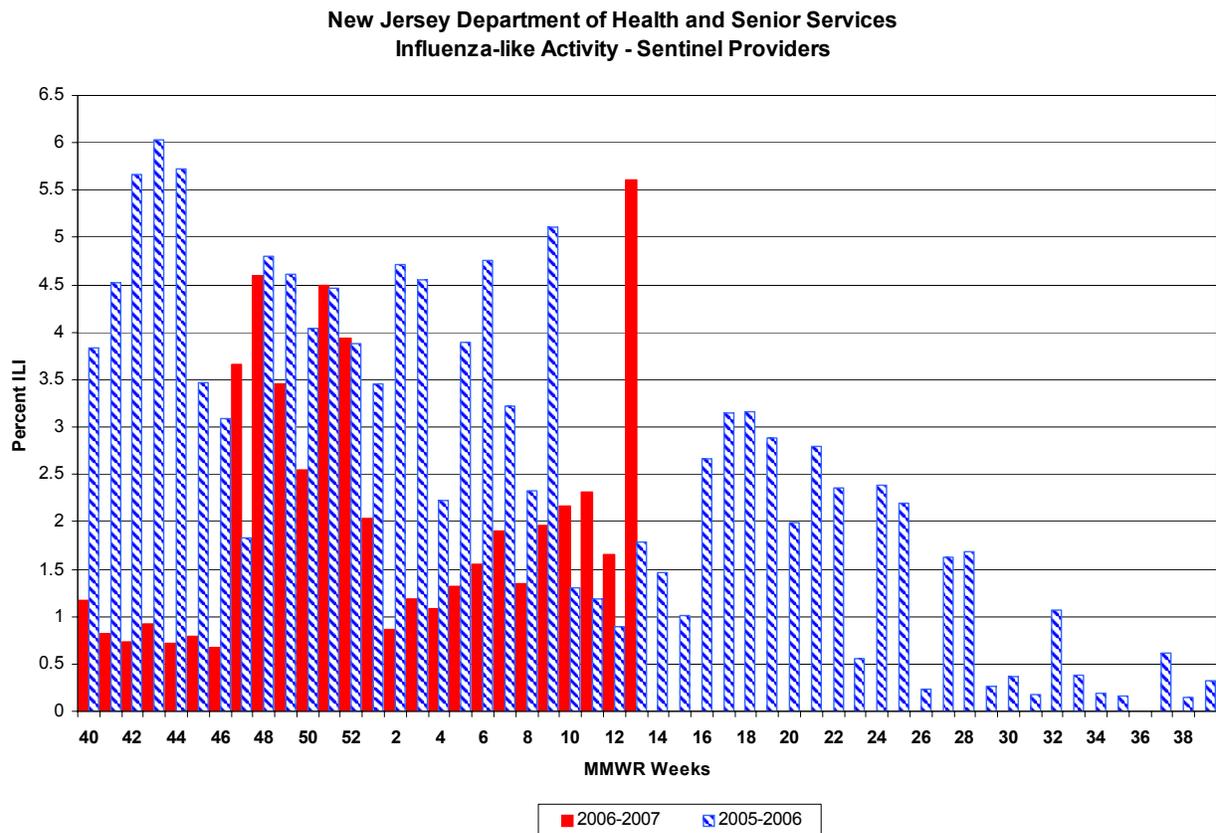

## **Sentinel Provider Surveillance**

During week 13, 5.60% of sentinel provider patient visits were due to ILI. These data reflect reports from two (4%) of the enrolled sentinel providers.

### **UPDATE**

During week 12, 1.65% of sentinel provider patient visits were due to ILI. These data reflect reports from fifteen (32%) of the enrolled sentinel providers.

During week 11, 2.32% of sentinel provider patient visits were due to ILI. These data reflect reports from fifteen (32%) of the enrolled sentinel providers.

## **Pediatric Influenza Surveillance**

To date, NJDHSS has received 86 reports of pediatric illness. To date, ten cases have met the case definition for pediatric illness or death associated with influenza.

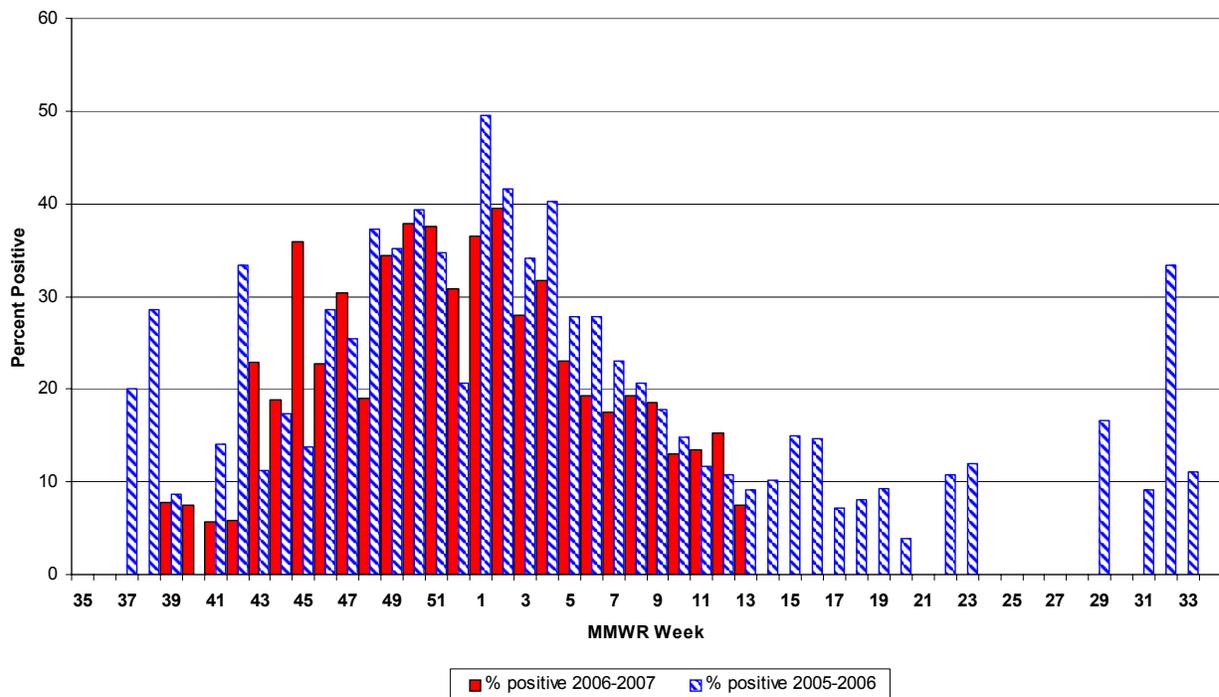

## **122 City Mortality Report**

During week 12, 5.70% of all deaths reported by the vital statistics offices in 6 New Jersey cities (i.e., Camden, Jersey City, Elizabeth, Newark, Paterson, Trenton) were due to pneumonia or influenza. This was a decrease over the previous week (8.46%). The percentage of death due to pneumonia or influenza for this same week last year was 6.34%.

## **RSV Reports**

During week 13, 7.52% of all RSV samples tested were positive. This was a decrease over the previous week 9.14%. The percent of samples positive RSV for this same week last year was 15.27%.
