

New Jersey Department of Health and Senior Services
Communicable Disease Service
Influenza Activity Summary
Week Ending March 8, 2008 (MMWR Week 10)

Influenza Activity Level: **WIDESPREAD**

NOTE: Three of three reporting parameters are above state baseline. Additionally, twelve counties had 2 of 3 parameters above baseline as well as several laboratory confirmed cases in the previous 3 weeks from these same counties.

No Activity - At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases

Sporadic - At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the state within previous 3 weeks **OR** at least one laboratory confirmed outbreak in an institution anywhere in the state

Local - At least 2 or 3 parameters above state baseline in a single county **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county

Regional - At least 2 of 3 parameters above state baseline in ≥ 2 but ≤ 10 counties **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in ≥ 2 but ≤ 10 counties

Widespread - At least 2 of 3 parameters above state baseline in > 10 counties **OR** institutional outbreaks in > 10 counties **AND** lab confirmed influenza cases in previous 3 weeks.

Parameter = School, emergency department, or long term care weekly surveillance data

Baseline is calculated by taking the average of statewide percentages of ILI for a 4 year (2004, 2005, 2006, 2007) period during months when influenza is less likely to be circulating (May-August). Weeks in which less than 4 counties reported were not included in the calculation.

**New Jersey Department of Health and Senior Services
Statewide Influenza Activity Levels**

Regional Data

REGIONAL – NE, NW, CW, CE AND SOUTH

Public Health Regions

NW Region (Morris, Passaic, Sussex, Warren)

NE Region (Bergen, Essex, Hudson)

CW Region (Hunterdon, Mercer, Somerset)

CE Region (Middlesex, Monmouth, Ocean, Union)

South Region (Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Salem)

No Activity- At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases in the public health region

Sporadic – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the public health region **OR** at least one laboratory confirmed outbreak in an institution anywhere in the public health region

Local – At least 2 or 3 parameters above state baseline in a single county of a public health region **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county of a public health region

Regional – At least 2 of 3 parameters above state baseline in at least half of counties of public health region **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in at least half of counties of public health region counties

Widespread – Not used for public health region data

Public Health Region Influenza Data

Laboratory Surveillance

As of week 10, 371 samples have been found to be positive by viral culture (117- AH1, 129- AH3 30- A unknown type and 95-B). Rapid and culture results by county are displayed below.

County	Week 40 to Week 10							Weeks 8, 9, 10

Viral Culture Positive Specimens by MMWR Week

Influenza-like Illness (ILI) Surveillance*

Emergency Departments

During week 10, 6.68% ILI was reported statewide from emergency departments. This is an increase over the previous week (6.24%). The percent ILI for each county ranged from 0.00 to 20.00%. The percent ILI for this same week last year was 5.73% in emergency departments. The percent ILI for the northwest (6.66%), northeast (8.41%), central west (8.62%), central east (5.54%) and south (6.23%) public health regions were above state baseline (3.30%).

Long-term Care Facilities

During week 10, 1.36% ILI was reported statewide from long term care facilities. This is a decrease over the previous week (1.38%). The percent ILI for each county ranged from 0.00% to 4.61%. The percent ILI for this same week last year was 0.77% in long-term care facilities. The percent ILI for the northwest (1.25%), northeast (2.18%), central east (1.16%) and south (1.37%) public health regions were above state baseline (0.86%). No new outbreaks in long term care facilities were reported in week 10.

Influenza-like Activity - Long Term Care Facilities

School Absenteeism

During week 10, schools reported 5.06% absenteeism. This is a decrease over the previous week (5.33%). The percent ILI for each county ranged from 2.99 – 7.03%. The percent absent for this same week last year was 6.25%. The percent ILI for the northwest (5.13%), northeast (5.51%), and south (5.30%) public health regions were above state baseline (4.85%).

Sentinel Provider Surveillance

During week 10, 2.34% of sentinel provider patient visits were due to ILI. These data reflect reports from five (13%) of the enrolled sentinel providers.

During week 9, 3.10% of sentinel provider patient visits were due to ILI. These data reflect reports from ten (26%) of the enrolled sentinel providers.

Pediatric Influenza Surveillance

To date, NJDHSS has received 44 reports of pediatric illness. A total of 19 cases have met the case definition. Of these, one death was reported in week 9.

122 City Mortality Report

During week 9, 9.93% of all deaths reported by the vital statistics offices in 6 New Jersey cities (i.e., Camden, Elizabeth, Newark, Paterson, Jersey City, Trenton) were due to pneumonia or influenza. This is an increase as the previous week (3.31%). The percentage of death due to pneumonia or influenza for this same week last year was 8.92%.

RSV Reports

During week 10, 6.78% of all RSV samples tested were positive. This was a decrease over the previous week 8.25%. The percent of samples positive for RSV for this same week last year was 13.08%.

Additional Information

For additional information regarding influenza surveillance please visit the following websites.
